SUMMARY

Product Engineer with 3+ years of experience building workflow-driven internal tools, ERP systems, dashboards, and full-stack business applications. Skilled in translating business requirements into scalable technical solutions that improve operational efficiency, reduce manual work, and support cross-functional teams. Strong background in JavaScript-based product development, REST API integrations, workflow automation, testing, technical documentation, stakeholder collaboration, and product delivery. Experienced in building secure, role-based systems and evolving personal product builds using modern tools and AI-assisted development.

SKILLS

Programming & Frontend: JavaScript, React, Vue 3, Angular, HTML5, CSS3, SCSS, Tailwind CSS, Vite, Responsive Design, Accessibility

Backend & Integrations: Node.js, Express.js, REST APIs, PostgreSQL, Prisma ORM, Flask, JWT Authentication, RBAC

Architecture & Platform Engineering: Monorepo Architecture, PNPM Workspaces, Turborepo, Shared UI Packages, Shared Config Packages, Role-Based Systems, Internal Tools, System Design

Automation & Product Delivery: Workflow Automation, ERP Systems, Agile, Scrum, Stakeholder Alignment, UAT, Change Management, Technical Documentation, MVP Development, Rapid Iteration

Testing, DevOps & Reliability: Playwright, Jest, Postman, Git, GitHub, GitHub Actions, CI/CD, Netlify, Railway, Security Checks

AI & Data: Claude, Codex, GitHub Copilot, BigQuery, SQL Server, Looker Studio, Data Automation

Design & Collaboration: Figma, Canva, Framer Motion

WORK EXPERIENCE

IT Technician / Front-End Developer
IBW Surveyors Ltd. | Remote, Toronto

Oct 2024 – Jul 2025

- Improved staff engagement by 10% by redesigning the company intranet using HTML, CSS, JavaScript, and modern UI principles, creating a more effective internal platform for daily operational use.
- Built executive dashboards with Google BigQuery, SQL Server, and Looker Studio, improving reporting visibility and operational decision-making.
- Reduced system downtime by 15% by partnering with MSPs to improve IT support processes and security posture.
- Contributed to an Angular-based client portal by building UI components and supporting data integrations across business systems.

ERP Systems Manager
IN Engineering & Surveying Ltd. | Hybrid, Brockville

Sep 2022 – Oct 2024

- Automated 90% of business workflows and drove 100% user adoption by leading a company-wide Odoo ERP implementation aligned with operational requirements and stakeholder needs.
- Built custom ERP modules using JavaScript, Python, XML/QWeb, and REST API integrations to reduce manual work and improve process efficiency across business operations.
- Translated business requirements into scalable internal workflows and shipped solutions using agile product delivery practices, improving reliability and long-term usability.
- Owned UAT, technical documentation, staff training, and change management, supporting adoption, process consistency, and maintainable system operations.
- Contributed to secure and role-based process design by supporting workflow structures tied to access control, system reliability, and operational governance.

- Increased inbound leads by 10% through SEO, analytics, and workflow-focused platform improvements that better connected business processes and digital operations.
 - Used ChatGPT to accelerate prototyping, debugging, workflow design, and implementation across automation and ERP-related work.
-

PROJECTS

Faako System Monorepo (On-Going)

Product Platform / Internal Systems Architecture

Tech: *React, Vite, Node.js, Express.js, PostgreSQL, Prisma ORM, PNPM, Turborepo, Tailwind CSS, JWT Auth, Playwright, Jest*

- Built and structured a multi-app monorepo powering ERP, admin, operations, and brand-facing applications using PNPM workspaces and Turborepo.
- Created reusable shared packages for UI, config, auth, and cross-app functionality to improve consistency and maintainability across products.
- Built frontend applications with React and Vite and backend services with Express, Prisma ORM, and PostgreSQL.
- Added reusable development and deployment workflows, including scripts for affected apps, deployment checks, app creation from reference builds, and security scanning.
- Used ChatGPT, Claude, Codex, and GitHub Copilot to accelerate implementation, debugging, refactoring, and system design decisions across personal product builds.

Modular Business Operations Platform

Tech: *React, Express.js, Prisma, PostgreSQL, Vite, Tailwind CSS, APIs, JWT Auth*

- Built a modular full-stack platform for bookings, invoicing, accounting, reporting, user control, and operational visibility.
- Designed a scalable role-based architecture with secure authentication, modular features, and reusable workflows.
- Used AI-assisted development tools to accelerate implementation and iteration across personal product work.

Modular Business Operations Platform
