EDUCATION

Trent university

2017 - 2022

Bachelor of Arts Honours (BAH),
Business and Computer Science

PROFILE

Product Engineer with 3+ years of experience building ERP systems, internal dashboards, and scalable web applications. Led ERP implementations with 90%+ adoption, built SaaS-style platforms from scratch, and translated complex operational workflows into intuitive, accessible products. Strong at bridging engineering, product strategy, and UX.

SKILLS

Product & Delivery: Agile / Scrum, Roadmapping & Backlog, Grooming Stakeholder Alignment, UAT & Change Management, Technical Documentation, Accessibility (a11y), Merchant Workflow Design

Front-End Development:

JavaScript (ES6+), React, Vue 3, Vite, Tailwind CSS, Bootstrap, SCSS, HTML5, CSS3

Back-End & ERP:

Node.js, Express.js, PostgreSQL, Prisma ORM, Odoo.sh, Odoo Studio, REST APIs, Flask, Git/GitHub (CI/CD)

Testing & DevOps: Playwright, Jest, Postman, GitHub Actions, Netlify, Railway

Data & Reporting: SQL Server, Google BigQuery, Looker Studio, Data Automation

Design & Prototyping: Figma, Canva, Framer Motion

EMPLOYMENT HISTORY

IT Technician / Front-End Developer at IBW Surveyors Ltd. **OCT 2024 - JULY 2025**

Remote, Toronto

- Contributed to a client-facing Angular portal, building UI components and data integrations.
- Redesigned internal intranet using HTML, CSS, and JavaScript, increasing staff engagement by ~10%.
- Built executive dashboards using Google BigQuery, SQL Server, and Looker Studio.
- Partnered with MSPs to improve IT security posture, reducing system downtime by ~15%.
- Automated onboarding and document workflows, improving staff ramp-up time.
- Supported internal product rollouts and continuous improvement initiatives.

ERP Systems Manager at IN Engineering & Surveying Ltd **SEPT 2022 - OCT 2024**

Hybrid, Brockville

- Led company-wide Odoo ERP deployment, automating ~50% of workflows and achieving 90% user adoption.
- Built custom ERP modules (Python, XML/QWeb, JavaScript) and REST API integrations.
- Owned UAT, technical documentation, and staff training for long-term sustainability.
- Drove digital strategy (SEO, analytics), increasing inbound leads by ~10%.
- Delivered features in agile cycles, translating business needs into shipped solutions.

PROJECTS

Party Rental ERP & E-Commerce Platform — *React, Express.js, Node.js, PostgreSQL, Playwright, Tailwind CSS*

[reebspartythemes.com](#)

- Built a full-stack ERP + customer storefront for a real business
- Implemented inventory management for rentals, sales, and outsourced items
- Designed role-based access, booking workflows, and payment flows
- Deployed production environments with CI/CD and automated testing

Modular Business Operations Platform - *React, Express, Prisma, PostgreSQL, Vite, Tailwind CSS, APIs, JWT Auth*

[dev.nanaabaackah.com](#)

- Developed a modular full-stack business operations platform with role-based access, dashboard analytics, bookings, invoicing, accounting, rent management, and reporting features.
- Designed a scalable architecture with secure authentication, user management, and system monitoring.
